LARCH

PRODUCT FEATURES

5S Inventory & Supply Chain Management

Precision-engineered software for modern automotive manufacturing

LARCH

WHAT'S INSIDE

A complete overview of our platform capabilities

01 **5S Core Features**

Sort · Set · Shine · Standardize · Sustain

02 **Inventory Management**

Control, Replenishment & Traceability

03 **SCM Module**

Supplier, Procurement & Logistics

04 **Quality & Compliance**

IATF 16949 Standards

05 **Integration & Tech**

ERP, MES, Cloud & Security

5S CORE FEATURES

LARCH

Sort · Set in Order · Shine · Standardize · Sustain

SORT

Auto-classify inventory by criticality & usage
Alerts for obsolete/slow-moving parts

SET IN ORDER

Visual bin mapping & QR location tracking
Kanban digital pull systems

SHINE

Inspection checklists with photo audit trails
KPI dashboards for housekeeping compliance

STANDARDIZE

SOP templates & 5S scorecards
Training / e-learning integration

SUSTAIN

Automated audit reminders
Root cause analysis & compliance scoring

INVENTORY MANAGEMENT

LARCH

For Automotive Manufacturing

Inventory Control

- Real-time stock levels across all locations
- FIFO / LIFO / FEFO processing
- Batch & lot tracking
- Safety stock & reorder calculations

Automated Replenishment

- Demand forecasting via historical usage
- Kanban & pull replenishment workflows
- Supplier lead time integration
- Auto PO on threshold breach

Tracking & Traceability

- Barcode / QR code scanning
- Serialized part tracking in production
- Audit trail logs (who, when, where)
- Recall-ready traceability

Analytics & Reporting

- Usage trend & aging reports
- Inventory valuation (std / avg)
- ABC parts classification
- Work order & scrap integration

SUPPLY CHAIN MANAGEMENT

LARCH

End-to-End Visibility

Supplier Management

- Supplier database with performance KPIs
- RFQ / RFI / Bid analysis tools
- Supplier scorecards (delivery, quality)
- Contract & compliance repository

Procurement & Purchasing

- Automated PR → PO workflows
- Approval hierarchies & spend control
- Budget visibility & PO tracking
- Real-time status updates

Logistics & Distribution

- Inbound/outbound shipment tracking
- ASN support & 3PL integration
- Load planning & route optimization
- EDI / API connectivity

Demand Planning

- MPS / MRP engines
- Historical & collaborative forecasting
- Scenario & what-if simulations
- Sales & supplier planning alignment

Supply Chain Visibility

- End-to-end dashboards
- Alerts for delays & stockouts
- Supplier & buyer portals
- Real-time bottleneck detection

QUALITY & COMPLIANCE

LARCH

IATF 16949 Standards

Why It Matters

Automotive manufacturing demands zero defects.
Our quality module ensures every component meets IATF 16949 standards with full digital traceability.

- **Inspection Plans —** Check sheets & templates
- **SPC —** Statistical Process Control
- **NC / CAPA —** Non-conformance workflows
- **Audit Trails —** Internal + external logs
- **Documentation —** Compliance repository

100%

Digital Audit Trails

IATF 16949

Certified Compliant

Real-Time

SPC Monitoring

CAPA

Root Cause Analysis

INTEGRATION & TECHNICAL FEATURES

Integration Capabilities

- ERP / Finance linkage
- MES / Production execution
- CAD / PLM for BOM sync
- EDI / API with suppliers
- Mobile apps for shop floor

Cloud & Security

- Role-based access control
- Multi-tenant cloud deployment
- Offline scanning support
- Data encryption & backups
- Compliant data storage

HOW WE SOLVE YOUR CHALLENGES

CHALLENGE	SOLUTION
Stockouts / production stops	Real-time stock + automated replenishment
Complex supplier network	Supplier performance & collaboration portals
Traceability for recalls	Lot/serial tracking across entire supply chain
Compliance audits	Digital audit trails & automated quality checks
Inefficient shop floor	5S monitoring + visual inventory control
Demand volatility	Forecasting engines + scenario planning

LARCH

READY TO TRANSFORM YOUR OPERATIONS?

5S Inventory & Supply Chain Management
Built for Precision Automotive Manufacturing

5S Compliant | **JIT Ready** | **IATF 16949** | **Cloud-Based** | **ERP Integration**
